Mattress User Manual | English (ENG)

Before the First Use

Many of our mattresses are rolled up for transport. Although you can use them immediately after delivery, they need 5 to 7 days to fully regain their shape and size. Since these are new products, each mattress has a smell that quickly dissipates through regular airing and vacuuming.

First Days of Usage

In the beginning, your mattress may seem a little firmer than expected. It needs some time to adjust - give it about a month to adapt to your body shape and posture.

Cleaning and Care

You can remove dust by vacuuming.

• When needed, use a mild textile detergent to get rid of any stains.

• Remember to avoid folding the mattress - it may damage the springs, foam and structure.

 Every mattress collects mites and dust and wears out over time, so we recommend replacing it with a new one after 8-10 years of everyday use.
