

A detailed technical line drawing of a wooden bunk bed frame, viewed from an isometric perspective. The frame consists of two levels: an upper bunk and a lower bunk. Each level has a base made of parallel wooden slats. The upper bunk is enclosed by a headboard and a footboard, both featuring vertical slats. A side railing is also present on the right side of the upper bunk. The lower bunk has a similar headboard and footboard but lacks side railings. The entire structure is supported by four vertical legs. The drawing uses clean lines to represent the wood and its assembly.
