2SL
IPS/EPS**

Version 04: 2010/10/04

Stempel / stamp / timbre

Lattenrost / slatted frame / Sommier

Kurzanleitung Einbau

Der OKIMAT ist für den Einbau in elektromotorisch verstellbare Lattenroste vorgesehen, er wird einbaufertig geliefert.

Falls die Motoren sich nicht in Einbaulage befinden sollten, schließen Sie bitte den Netzstecker an (bei Ausführung Netzfreischaltung dann die grüne Taste im Stecker für 1 Sek. drücken). Betätigen Sie die Abwärtstasten an ihrem Handschalter. Die Motoren fahren in Einbaulage. Ziehen Sie jetzt aus Sicherheitsgründen den Netzstecker.

Legen Sie zur einfacheren Montage den Lattenrost auf den Rücken, damit der Beschlag nach oben zeigt. Entfernen Sie die Seitenschieber ④, drücken Sie den OKIMATEN fest auf die Hebel am Beschlag bis der OKIMAT in die vorgesehenen Aufnahmen ⑤ einrastet. **Das aufgeprägte Rückensymbol ⑥ muss in Richtung Kopfende des Lattenrostes zeigen!** Setzen Sie die Seitenschieber ④ wieder auf.

Stecken Sie das Handschalterkabel ein ① und führen Sie das Kabel durch die Zugentlastung ②. Legen Sie den Lattenrost in das Bettgestell und stecken Sie den Netzstecker in die Steckdose.

Bei Ausführung mit Netzfreischaltung und Notabsenkung (siehe Sonderausstattung) befindet sich im Netzstecker eine grüne Taste, die nach dem Einstecken 1 Sek. lang gedrückt werden muß, damit der interne Energiespeicher aufladen kann. Danach bitte Batterie ankleben ③.

Achtung: max. 5 Schaltzyklen pro min. Bei Ausführungen mit Infrarot oder Funk lesen Sie bitte die spezielle Montageanleitung. Zur vollständigen Inbetriebnahme lesen sie bitte die Montageanleitung.

Sonderausstattung Netzfreischaltung

Die Netzfreischaltung schützt vor elektromagnetischen und elektrischen Wechselfeldern. Im Netzstecker trennt ein 2-poliges Relais nach jeder Handschalterbetätigung die Netzfreischaltung vom Hausnetz (hörbares Relaisklicken).

Der Antrieb ist dann völlig Netzspannungsfrei und das gesamte System verbraucht im Ruhezustand keinen Netzstrom. Die Netzfreischaltung arbeitet mit allen übergeordneten Netzfreischaltungen zusammen.

D

Short mounting instructions

The OKIMAT is intended to be mounted in electromotoric adjustable slatted frames and is supplied ready for installation.

If the motors are not in the correct position for installation, connect the plug (if supplied with mains isolation circuit, push green button for 1 sec.). Then push the downwards buttons on the handset. The motors will move to the right position for installation. Pull the connection plug for safety reasons.

For easier fitting put the slatted frame upside down so that the steel pipes point up. Remove the sliding covers ④. Push the OKIMAT firmly over the lever until the pipes snap in the U-shaped gap ⑤. Make sure that the back symbol ⑥ on the OKIMAT points towards the head section of the slatted frame. Close the sliding covers again ④.

When the installation of the OKIMAT is complete, please check that the handset cable is plugged in ① and pull it through the strain relief ②. Now put the slatted frame into the bed and plug the connection plug into the socket.

Models with mains isolation circuit and auxiliary movement (see special equipment) are fitted with a green button on the plug, which must be pushed for 1 sec. after connection, to load the internal energy storage. Then attach the battery ③.

Attention: max. 5 cycles per minute. For versions with IR or RF please read the special mounting instruction. For complete commissioning please read the mounting instruction.

Special equipment Mains isolation circuit

Mains isolation protects against potential dangers resulting from electrical or magnetic alternating fields since a 2-pole relay in the connection plug cuts immediately off mains connection (audible click in the relay).

Now the actuator is completely isolated from the mains, and the complete system does not use any current at rest. The mains isolation circuit works together perfectly with all preceding mains isolation circuits.

GB

Instructions concises pour le montage

Le moteur OKIMAT est prévu pour le montage dans des sommiers à lattes réglables par moteur électrique. Après la livraison, il est prêt à être installé.

Si les moteurs ne sont pas en position de montage, embrochez la fiche secteur (sur le modèle à déconnexion du réseau, appuyer sur la touche verte dans la fiche pendant 1 seconde; voir la fig.w). Actionnez les touches de descente sur votre unité de télécommande. Les moteurs vont en position d'installation. Pour des raisons de sécurité, débranchez maintenant la fiche secteur.

Afin de faciliter le montage, retournez le sommier à lattes d'une manière que les tuyaux d'acier soient dirigés vers le haut. Enlevez les couvercles à coulisses ④, poussez le moteur OKIMAT rigidement sur le crochet, jusqu'à ce que les tuyaux soient bloqués dans les encoches ⑤. Le symbole ⑥ doit être dirigé vers le chevet du sommier à lattes. Remettez les couvercles à coulisses ④ en place.

Enfichez le câble de l'unité de télécommande ① et insérez le câble dans le dispositif de soulagement de traction ②. Mettez le sommier dans le lit et embrochez la fiche secteur dans la prise.

Sur le modèle avec déconnexion du réseau et fonction de descente auxiliaire (voir Accessoires), la fiche secteur possède une touche verte. Après l'enfichage, celle-ci doit être enfoncée pendant 1 seconde pour charger l'accumulateur d'énergie interne. Ensuite, connecter la pile ③.

Attention: max. 5 cycles de commutation par minute. Pour la mise en service complète, lisez les notices de montage. Pour les modèles à récepteur infrarouge ou radioélectrique, lisez les notices de montage correspondantes.

Accessoires Déconnexion du réseau (en option)

La déconnexion du réseau garantit la protection contre les champs électromagnétiques et électriques alternatifs. Lorsqu'on actionne l'unité de télécommande, un relais à 2 pôles dans la fiche secteur assure la déconnexion du secteur (vous entendez le clic du relais).

Le moteur est alors complètement libre de tension. A l'état de repos, le système ne consomme pas d'énergie. La fonction de déconnexion s'intègre parfaitement dans tous les circuits supérieurs pour la déconnexion du réseau.

IPS/EPS**

Version 04: 2010/10/04

Resetfunktion (optional)

Damit auch bei Stromausfall in die Liegeposition gefahren werden kann, gibt es als Sonderausstattung eine Resetfunktion die über eine eingebaute 9 Volt Blockbatterie ermöglicht wird. Die Absenkgeschwindigkeit ist reduziert. Bei Stromausfall wird die Batterie automatisch aktiviert, wenn die Tasten für Kopf- und Fußteil "abwärts" gedrückt werden.

Obwohl die Batterie mehrmalige Resets ermöglicht, empfehlen wir aus Sicherheitsgründen nach jedem Reset den Austausch, spätestens aber nach einem Jahr, da dann die Kapazität nachläßt.

Achtung: Die zur Erstausrüstung verwendeten Batterien sind frei von Cadmium und Quecksilber. Trotzdem gehören verbrauchte Batterien nicht in den Hausmüll. Geben Sie diese bitte bei entsprechenden Sammelstellen oder im Handel ab.

Behebung von Störungen (Allgemein für alle OKIMATEN)

Motoren arbeiten nicht, wenn der Handschalter betätigt wird:
Netzanschluß überprüfen, Handschalterstecker überprüfen
OKIMATEN mit Netzfreischaltung und Notabsenkung zusätzlich:
grüne Taste im Netzstecker drücken. Nach erfolgter Notabsenkung arbeiten die Motoren nicht, obwohl Netzspannung da ist; grüne Taste im Netzstecker drücken und Batterie erneuern.

ACHTUNG

Der OKIMAT ist nur für den Einsatz in Lattenrosten bestimmt. Überlastung vermeiden. Nicht länger als 2 Min. dauernd betätigen, da sonst Beschädigungen entstehen können, für die der Hersteller nicht haftet.

- Handschalter stets zugentlasten und korrekt anschließen.
- Netzstecker korrekt und fest in die Steckdose stecken.

-Der OKIMAT darf nur von autorisiertem Fachpersonal geöffnet werden! **Vor dem Öffnen Netzstecker ziehen.**

-Eigenmächtige Instandsetzungen und Veränderungen schließen eine Haftung des Herstellers für daraus entstehende Schäden aus.

Technische Daten

Netzanschluß 100 / 110/ 230 / 240 Volt AC 50 / 60 Hz
Der OKIMAT arbeitet mit einer Gleichspannung von 24 V DC
Einschaltdauer 15% bei einem maximalen Dauerbetrieb von 2 min.
Schutzart: Gefertigt nach VDE Schutzklasse II
Leistungsbedarf, je nach Belastung und Typ 30 - 300 Watt
Sonderausstattung: Netzfreischaltung kompatibel mit übergeordneten Netzfreischaltungen / Notabsenkung bei Stromausfall

D

Reset function (optional)

As a special equipment an installed 9 V manganese battery allows an reset into horizontal position in the case of apower failure. The battery is automatically activated, if the buttons for "head and foot part down" are pushed. The subside speed is reduced. Although the battery can manage several resets, we suggest to change it after each reset or after 1 year at the latest, because the capacity of the battery will deteriorate.

Attention: The batteries initially supplied with the motors are free from cadmium and mercury. The nevertheless must not be put in the bin. Please return them to special collections or at the retailer's.

Trouble shooting (General for all OKIMAT)

Motors do not work when the handset is used: Check the mains connection, check the plug of the handset
Additionally for OKIMAT with mains isolation circuit and auxiliary movement: Push the green button of the mains connection plug (see drawing @) after using the auxiliary movement the motors do not work despite supply voltage. Press green button of the mains connection plug and renew the battery.

ATTENTION

The OKIMAT must only be used for slatted frames. Avoid overload. Do not use continuously for more than 2 minutes for risk of damage for which the manufacturer cannot be held responsible.

The handset must be free of stress at all times and must be connected correctly. Ensure that the plug is connected correctly.

Only authorized personnel are allowed to open the OKIMAT. **Disconnect from mains before opening.**

The manufacturer does not accept any responsibility for damages resulting from repairs or changes carried out by the customer.

Technical data

Mains connection 100 V / 110 V / 230 V / 240 V AC, 50/ 60 Hz.
The OKIMAT works with a direct voltage of 24 V DC.
Intermittent duty with 50 VA transformer 15% with a maximum continuous operation of 2 min.
Manufactured in accordance with VDE protection class II
Force, depending on load and model: 30 - 300 V Special equipment:
- Mains isolation circuit compatible with general mains isolation systems
- Auxiliary movement in the case of current failure

GB

Fonction reset (en option)

En cas de défaillance de l'alimentation, une pile monobloc 9V incorporée, disponible en option, permet de descendre le lit dans la position horizontale. La vitesse de descente est réduite. Lorsque l'alimentation est coupée, la pile est activée automatiquement aussitôt qu'on appuie sur l'une des touches pour la descente de la partie dorsale ou du chevet. Bien que la pile soit capable de descendre le lit plusieurs fois, nous recommandons de la remplacer après chaque fois qu'elle est utilisée pour la remise en position horizontale, mais au plus tard après un an.

Attention: Les piles livrées avec le moteur sont libres de cadmium et de mercure. Malgré cela, les piles épuisées ne doivent pas être éliminées avec les ordures ménagères. Nous vous prions de bien vouloir les remettre à un point de ramassage ou à votre distributeur.

Dépannage (instructions générales pour tous les moteurs OKIMAT)

Lorsqu'on actionne l'unité de télécommande, le moteur ne fonctionne pas: 1. Contrôler le raccordement à l'alimentation, 2. Vérifier la fiche de l'unité de télécommande.
Mesures supplémentaires sur les modèles OKIMAT avec déconnexion du réseau et fonction de descente auxiliaire: Appuyer sur la touche verte dans la fiche secteur (fig.). Bien que la tension d'alimentation arrive au moteur, celui-ci ne fonctionne pas après l'utilisation de la fonction de descente auxiliaire: appuyer sur la touche verte dans la fiche secteur (fig.) et remplacer la pile.

ATTENTION

Le moteur OKIMAT est destiné uniquement à l'installation sur des sommiers à lattes. Eviter la surcharge. Pour éviter des endommagements pour lesquels le fabricant n'assume pas de responsabilité, l'actionnement en continu pendant plus de 2 minutes n'est pas admissible. Attention au raccordement correct de l'unité de télécommande, en tenant compte du soulagement de traction.

Embrocher la fiche secteur correctement dans la prise (bon contact). Le moteur OKIMAT ne doit être démonté que par du personnel autorisé! **Avant le démontage, débrocher la fiche secteur.** -Le fabricant refuse toute responsabilité pour les endommagements après des réparations et des modifications sans autorisation.

Caractéristiques techniques

Alimentation 100 / 110/ 230 / 240 Volts c.a.; 50 / 60 Hz
Le moteur OKIMAT est alimenté en 24 V c.c.
Cycle d'action en fonctionnement continu pendant max. 2 min.: 15%
Mode de protection: Fabriqué selon les standards VDE, classe de protection II
Puissance exigée, selon la charge et le type: 30 à 300 Watts
Accessoires en option: Fonction de déconnexion du réseau, compatible avec les circuits supérieurs pour la déconnexion du réseau / fonction de descente auxiliaire en cas de défaillance secteur

Disclaimer and exclusion of liability

DewertOkin is not responsible for damage resulting from:

- failure to observe these instructions,
- changes made to this product which have not been approved by DewertOkin, or
- the use of replacement parts which have not been approved or manufactured by DewertOkin.

Creation of a complete operating instruction manual for the entire end product

These instructions are only intended to be used by the end-product manufacturer. They should not be given to the operator of the end product. The factual information contained within may be used as a basis when creating the end-product manual.

The warning and danger notices are best suited for use in the end product's manual. However it is not sufficient to simply follow these notices. You should also carry out an internal risk assessment for your end product. This can then be used as the basis for the safety notices in your manual.

These installation instructions do not contain all information required to safely operate the end product. They only describe the installation and operation of the drive as partially completed machinery.

The instructions are intended for the technicians responsible for manufacturing an end product and not for the operators of the end product.

Notice for customers in EU nations

German Inspection Authority (TÜV SÜD Product Service) testing label

The construction of the OKIMAT 4 has been inspected by the German TÜV SÜD Product Service Inspection Authority. TÜV SÜD Product Service also monitors the production of the OKIMAT 4. The official German TÜV SÜD Product Service certifies this construction inspection and production monitoring.

1. General Information

- ▶ The name "OKIMAT 4" shall be used to refer to the models OKIMAT 4 IPS, OKIMAT 4 IPSe and OKIMAT 4 EPS and OKIMAT 4 EPSe, unless there is a reference to a specific model.

These installation instructions must be followed closely in order to install this drive successfully and safely in the end product. These instructions are not an operating manual for the end product.

These instructions will help you to minimize danger, repair costs and down times. They will also help you to maximize the reliability and lifespan of the end product.

CAUTION

The notices in these instructions must be followed! Following the guidelines during installation and connection procedures will help to minimize:

- the risk of accident and injury, and
- damage to the drive system or the end product.

These installation instructions have been written with due care and attention. However, we cannot guarantee that the data, images and drawings are complete and correct nor do we accept any liability for the information contained therein, unless required by law.

Availability of this document

As manufacturer of the end product, you are obligated to comply with Machinery Directive 2006/42/EC. This directive stipulates that the installation instructions must be kept on file for governmental inspection purposes.

1.1 Safety notices within the installation instruction and the operating instructions for the entire machine

The manufacturer of the end product is only permitted to operate the OKIMAT 4 drive (by itself an incomplete machine)

- when the end product (for which the OKIMAT 4 drive is intended) is in compliance with all protective measures specified in the Machinery Directive 2006/42/EC, and
- when the manufacturer expressly declares the compliance of the end product.

The manufacturer of the end product must create a manual for the users of that product. The safety notices in the end-product manual must be written based on the end product's risk assessment.

1.2 Conventions used

Notices which do not relate to safety are indicated in these instructions with a triangle:

- ▶ Triangular notice symbol

Safety notice explanations

CAUTION

CAUTION indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

NOTICE

NOTICE is used to address practices which are not related to personal injury but may result in damage to the product or surroundings.

2. Safety notices

2.1 Proper and intended usage

The OKIMAT 4 drive is meant to be installed in beds.

- They provide motor adjustment capabilities for movable reclining bed parts. They should be used in conjunction with suitable brackets and mechanics.

CAUTION

Risk of accident

This drive should only be used for the applications described above. Any other use is forbidden. Improper usage can lead to accidents or destruction of the unit. Such non-approved applications will lead immediately to the expiration of all guarantee and warranty claims on the part of the end-product manufacturer against the manufacturer.

Improper usage

Be sure to follow the notices below concerning improper usage. You should include them in your product manual in order to inform the users of your end product.

The OKIMAT 4 drive should not be used:

- in any environment where combustible or explosive gases or vapours (e.g., anaesthesiology) may be present,
- in a moist environment,
- outdoors,
- in any application that will be cleaned with an automated washing system,
- with forces which exceed those specified on the ratings plate.

The OKIMAT 4 drive can be used by children of 8 years and older, persons with reduced physical, sensory or mental capabilities, or persons with lack of experience or knowledge when they are supervised or instructed concerning the safe use of the device and when they understand the resulting risks. Do not allow children to play with this device. The cleaning and user maintenance must not be carried out by children without supervision.

- ▶ You should only use spare parts which have been manufactured or approved by DewertOkin. Only these parts will guarantee a sufficient level of safety.

Optional: battery-operated reset function**NOTICE**

The battery-operated reset function is not a safety system and does not avert danger.

DewertOkin does not guarantee that the drive will function in the event of a power outage.

If the end-product manufacturer chooses to guarantee the functionality of the end product during a power outage, then the end-product manufacturer is responsible for arranging a mechanism to ensure this functionality.

2.2 Selection and qualification of personnel

The installation of the drive in the end product may only be performed by qualified personnel.

2.3 OKIMAT4 (IPS / IPSe) ratings plate

- ▶ The ratings plates shown are examples; the specifications for your drive may differ from this illustration.

Figure 2 Ratings plates (examples)

3. Possible combinations

The OKIMAT 4 drive can be combined for use with other DewertOkin components. The following basic combinations are possible:

- OKIMAT 4 with cable-bound handset
- OKIMAT 4 with built-in RF wireless receiver and RF hand-held remote control
- OKIMAT 4 with external RF wireless receiver and RF hand-held remote control

Systems can be customized by combining drives and OKIN control units. The system components must be connected in a specific order. The mains plug should only be plugged in after all other components are connected.

DewertOkin has separate system instruction manuals containing all information and instructions needed for these systems.

- ▶ Only a DewertOkin device should be used to control the drive since they have already been verified to work together.

4. Description

The drive is powered by electrical motors. The back and leg sections of a bed can be adjusted depending on the drive options. The drive is controlled by means of an OKIN control unit.

The drives differ in their:

- motor power,
- optional reset function,
- different stroke variants,
- optional built-in RF radio receiver,
- country-specific mains power cable and plug.
- optional variant with an external switched-mode power supply (EPS / EPSe),

4.1 Components

The components have a compact design – with two linear adjusting units and a control unit located within an enclosed housing. To facilitate the tool-free assembly process, the two sliders on the side (the shutters) can be removed from the housing.

CAUTION

Risk of accident

Please follow these operating instructions carefully. You could be injured by fire or electrical shock if you do not follow these assembly instructions.

The appropriate pluggable power supply cord is included, depending on the regional version (USA, continental Europe EURO flat plug, the UK, Australia or Japan).

NOTICE

Only use the proper power cable that is permitted in your country. Be sure to use the correct plug adapter, as shown in the following illustration. Follow the specifications on the ratings plate.

- ▶ There is a delay after the supply voltage is applied before the device actually turns on. Wait at least two seconds before beginning the commissioning.

CAUTION

Risk of accident

Electrical components should be connected or disconnected only when the power supply cord is unplugged.

4.1.1 Option: Built-in switched-mode power supply (IPS / IPSe) with pluggable power supply cord

Figure 4 Pluggable power supply cord

- | | |
|---------------------------------|--------------------------------------|

| C Power plug (EURO flat) | D Power plug (United Kingdom) |
| E Foot side | F Head side |

4.1.2 Option: External switched-mode power supply (EPS / EPSe)

A port on the OKIMAT 4 EPS / EPSe permits the corresponding power supply to be connected (e.g. the Power Supply PD12/PD13).

Figure 5 External switched-mode power supply

Dimensions of housing

Figure 6 OKIMAT 4 (specified in mm)

Dimensions of the pivot lever

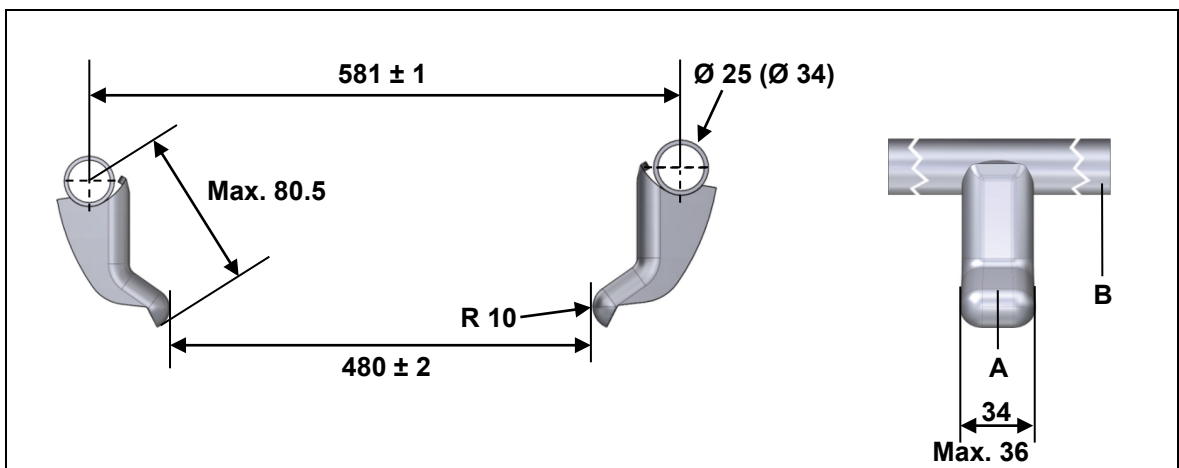

Figure 7 Pivot lever position, in mm

A Pivot lever (OKIN)

B Axle support

- ▶ Make sure that you consider the amount of torque that is generated by the drive when you design the weld between the bracket and the end product.
 - Version 4500 N: Max. torque: 325 Nm.
 - Version 5500 N: Max. torque: 396 Nm.
 - Version 6500 N: Max. torque: 468 Nm.
- ▶ We recommend: the OKIN pivot lever (ID number 2.00.718.108.00)

6. Installation

6.1 Safety notices to observe during installation

Basic safety rules must be followed in order to ensure that the end product can be continually operated in a safe manner. These rules must be observed while using the end product and while installing the drive.

Avoiding fatigue fractures

Drives that are incorrectly installed can undergo fatigue fractures which then create a risk of injury.

- Install the drive in the end product so that it is properly aligned. This will help prevent shear stress.
- Do not position the drive at a slanted angle when installing it in the end product. A slanted angle between the intended direction of movement of the end product and the drive's direction will create shear stress and could lead to a fatigue fracture.

Avoiding a pinching hazard

When designing your product, you should take the drive adjustment movement into account with passive safety mechanisms and with the appropriate safety notices in your operating instructions.

- Installation methods for ensuring passive safety: Install the OKIMAT 4 drive so that none of the positions where shear and pinch hazards exist are accessible externally.

Make sure that your operating instructions inform the user of these safety points.

6.2 Installation procedure

6.2.1 An installation example

Before installing the drive, make sure that you are observing all of the safety notices found in the "Safety notices to observe during installation" section.

- 1 Move your product into a position where it is supporting no load.

CAUTION

Danger of pinching/crushing injuries!

- Be sure to carry out work on the drive in a position so that no loads are bearing on it. Only in this way can you be sure to avoid any risks of crushing or injury.
- Disconnect the nine-volt battery if you are using the battery-operated reset function.

- 2 Pull the shutters firmly to the side (A). The slots (B) for the brackets (D) are now uncovered.

Figure 8 Installing the drive

A Shutters

B Fitting mounts

- 3 Align the OKIMAT 4 next to your product. The slots for the back and leg sides must be properly aligned with the correct brackets on your end product (refer to the symbols on the OKIMAT 4 as described in Figure 4).

Figure 9 Installing the drive

C End product (bed)

D Brackets with pivot lever

Figure 10 Installing the drive

- 4 Push the drive in so that the brackets (**D**) fit into the slots (**B**). Press in until the tubes snap into the brackets.
- 5 Close the shutters (**A**) on the drive by snapping them back in. The OKIMAT 4 is now securely attached to the end product.
- 6 Disconnect all additional components (handset, etc.) from their sockets.
- 7 Now connect the drive to the power supply.

Please note, after the power supply has been connected:

- ▶ There is a delay after the supply voltage is applied before the device actually turns on. Wait at least two seconds before beginning the commissioning.

6.2.2 Mounting the adapter for the receiver and control unit (optional)

There are optional adapters available for the RF ECO BASIC and RF ECO BT / RF ECO BT M receivers, as well as the HE150 control unit. The receiver and the control unit can be placed in the adapter. The adapter is attached to the OKIMAT 4.

Mounting the adapter for the RF ECO BASIC

Figure 11 Mounting the adapter for the RF ECO BASIC

- | | |
|------------------------------|-------------------------|
| A Mounting attachment | B Locking clips |
| C Adapter | D Handset socket |
| E RF ECO BASIC | F OKIMAT 4 |

- 1 Push the adapter's locking clip into the OKIMAT 4's mounting attachment until you hear the clip snap in.
- 2 You can put the RF ECO BASIC into the adapter after you have mounted the adapter.
- 3 Connect the plug from the RF ECO BASIC to the handset socket on the OKIMAT 4.

Mounting the adapter for the RF ECO BT / RF ECO BT M

Figure 12 Adapter mount for the RF ECO BT / RF ECO BT M

- | | |
|----------------------------------|------------------------------------------------|
| A Mounting attachment | B Guide for the RF ECO BT / RF ECO BT M |
| C Adapter | D Handset socket |
| E RF ECO BT / RF ECO BT M | F OKIMAT 4 |

- 1 Push the adapter's locking clip into the OKIMAT 4's mounting attachment until you hear the clip snap in.
- 2 You can put the RF ECO BT / RF ECO BT M into the adapter after you have mounted the adapter.
- 3 Connect the plug from the RF ECO BT / RF ECO BT M to the handset socket on the OKIMAT 4.

Mounting the adapter for the HE150 control unit

Figure 13 Mounting the adapter for the HE150

- | | |
|----------------------------------------|-----------------------------------------|
| A Mounting attachment | B Guide for the HE150 |
| C Connecting socket in OKIMAT 4 | D Adapter |
| E cable guide | F Connecting cable |
| G HE150 control unit | H Connecting socket of the HE150 |

- 1 Push the adapter's locking clip into the OKIMAT 4's mounting attachment (**A**) until you hear the clip snap in.
- 2 Connect the connecting cable plug to the connecting socket of the OKIMAT 4 (**C**).
- 3 Route the connecting cable (**F**) in the cable guide (**E**) of the adapter.
- 4 Put the HE150 control unit (from the top downwards) into the adapter's guide (**B**).
- 5 Connect the connecting cable plug to the connecting socket on the HE150 (**H**).

Removing the adapter

Figure 14 Removing the adapter (an example)

- 1 Disconnect the plug of the receiver or HE150 control unit from the handset socket.
- 2 Take the receiver or control unit (RF ECO BASIC, RF ECO BT / RF ECO BT M, RF-M-BT or HE150) out of its adapter.
- 3 To remove the adapter, use a screwdriver to carefully unlock the locking clip (as shown in Figure A). Then pull out the adapter (B).

Threading the handset cable, power cable and connecting cable into the strain relief mechanism

Figure 15 Looping the cable through the strain relief mechanism

A Cross over the looped-in cable

B Guide one cable end back behind the loop

C Secure cable to strain relief

CAUTION

Risk of accident

Electrical components should be connected or disconnected only when the power supply cord is unplugged.

- 1 To attach the handset cable: Connect the plug from the handset to the handset socket on the OKIMAT 4.
- 2 Push the cable in a loop through the strain relief (as shown by **A** in Figure 15).
- 3 Run the right cable strand first under the left strand and then behind and through the loop (as shown by **B** in Figure 15).
- 4 Place the loop over the peg on the drive and pull the loop back slightly (as shown by **C** in Figure 15).
- 5 In order to secure the power cable: Connect the power cable plug to the power socket on the OKIMAT 4. Repeat steps 2 through 4 with the power cable using the second strain relief.

6.2.3 Electrical connection

**CAUTION****Risk of accident**

Electrical components should be connected or disconnected only when the power supply cord is unplugged.

- ▶ There is a delay after the supply voltage is applied before the device actually turns on. Wait at least two seconds before beginning the commissioning.

Option: Pluggable power cable (OKIMAT 4 IPS / IPSe)

Figure 16 Pluggable power supply cord

B Power plug (Australia)

C Power plug (EURO flat)

D Power plug (United Kingdom)

Option: Connecting the OKIMAT 4 EPS / EPSe to an external power supply

Figure 17 External switched-mode power supply (SMPS)

A Cable for the external power supply

B Handset socket

Optional: battery-operated reset function
Connecting the nine-volt battery

Figure 18 Connecting the nine-volt battery

A Nine-volt battery (type 6LR61)

B Battery clip

C Battery compartment for 1 or 2 batteries

NOTICE

For the RF radio variants, the nine-volt battery may discharge whenever the mains voltage is not connected.

Routing the electrical cables

When routing the cables, be sure that:

- the cables cannot get jammed,
- no mechanical load (such as pulling, pushing or bending) will be put on the cables, and
- the cables cannot be damaged in any way.

Fasten all cables (especially the mains cable) to the end product using sufficient strain relief and kink prevention methods. Be sure that the design of the end product prevents the mains cable from coming into contact with the floor during transport.

6.2.4 Dismantling

<p>⚠ CAUTION</p> <p>Risk of accident</p> <ul style="list-style-type: none"> • Electrical components should be connected or disconnected only when the power supply cord is unplugged. • Disconnect the nine-volt battery if you are using the battery-operated reset function.

► Certain details may change because of technical changes.

Figure 19 Removing the drive

1 Move your product into a position where it is supporting no load.

<p>⚠ CAUTION</p> <p>Danger of pinching/crushing injuries!</p> <p>Be sure to carry out work on the drive in a position so that no loads are bearing on it. Only in this way can you be sure to avoid any risks of crushing or injury.</p>

- 2 Disconnect the OKIMAT 4 from the power supply!
- 3 Disconnect the connecting cables from all additional components (e.g. handsets) from their sockets.
- 4 Be sure to support the drive's weight to prevent it from falling.
- 5 Pull strongly on the shutters (A) sideways until they are completely out.

Figure 20 Removing the drive

C End product (bed)

D Brackets

- 6 Pull out the OKIMAT 4 far enough so that the brackets (D) are out of the slots (B). The OKIMAT 4 is now unattached and can be removed.

Figure 21 Removing the drive

A Shutters

B Fitting mounts

- 7 Push the shutters (A) back onto the OKIMAT 4 so that they are not lost during transportation.

7. Information about creating your Operating Manual

The factual information contained within may be used when you are creating the end-product manual. The installation instructions do not contain all information required for the safe operation of the end product. They only describe the installation and operation of the drive as a partially assembled piece of machinery.

- ▶ When creating the operating instructions, remember that the installation instructions are intended for qualified specialists and are not for typical users of the end product.

7.1 General information

- ▶ Only a DewertOkin device should be used to control the drive since they have already been verified to work together.

Delayed start-up

After plugging the power plug into the power outlet:

- ▶ There is a delay after the supply voltage is applied before the device actually turns on. Wait at least two seconds before beginning the commissioning.

Power-on time / intermittent operations

The OKIMAT 4 drive has been designed for intermittent operations. Intermittent operation is an operational mode where the drive must pause after a specified maximum period of operation (power-on time). This protects the drive from overheating. Extreme overheating can cause a malfunction.

- ▶ The ratings plate specifies the maximum power-on time and the required pause intervals.

Avoiding toggle operations

You should avoid switching from one direction of travel to the opposite direction without first stopping the motor. Make sure that you pause between motions! A pause (motor stop time) can be activated using the controls.

NOTICE
You should always avoid a quick change (toggling) of directions.

Shutting off the drive

To shut off the drive, first disconnect the system from the power supply and then disconnect the battery. The power supply must always be accessible during operations so that the system can be shut off.

7.2 Handset / hand-held remote control

Figure 22 Examples of handset / hand-held remote control

A Baseline handset

B Topline handset

C RF ECO hand-held remote control, for external or internal wireless reception (RF)

D Adjustment keys

- ▶ The adjustment motions are carried out by pressing on the corresponding symbol keys on the handset/hand-held remote control.

7.2.1 Configuring the RF ECO hand-held remote

Figure 23 Example: Configuring the RF ECO hand-held remote

- A** Button **B** OKIMAT 4 with built-in RF
C RF ECO hand-held remote

- 1 Press the function key on the drive (**A** in Figure 23) twice (a quick double click). The drive will now be in the teach-in (configuration) mode for approximately 10 seconds. The LED on the function key lights up.
- 2 Press the (**E**) and (**D**) keys simultaneously on the RF ECO hand-held remote. Hold down both keys until the function key's LED starts to blink. The RF ECO remote is now configured and ready to use.

7.2.2 Deactivating the RF ECO hand-held remote

You can interrupt communications between the hand-held remote and the drive; this is useful if you wish to decommission the remote or if the programming for the remote was unsuccessful. Take the following steps:

- 1 Press the function key on the drive (**A** in Figure 23) four times quickly.
- 2 Then press the function key (**A**) one more time. The RF ECO remote is now deactivated.

7.3 Notice for operating with optional configuration

7.3.1 Optional: battery-operated reset function

The battery-operated reset function allows the drive system to be operated during a power outage. One or two nine-volt batteries are used to power the OKIMAT 4 in the event of an outage. The batteries are not connected by default since they have very limited capacity. They can only be used once to power the reset function. The used batteries should then be replaced and properly disposed of.

NOTICE
The battery-operated reset function is not a safety system and does not avert danger.

When working with radio units (RF), first disconnect the drive system from the power supply! Connect the nine-volt battery first when you would like to perform a battery-operated reset. The battery may only be used to power the reset function one time. Take out the battery and dispose of it properly after the reset function has been carried out.

- ▶ If the end product is under a heavy load which prevents the reset function from operating, the strain or load on the end product must first be removed before a reset can be carried out.

7.3.2 Additional operating controls

For more information on operating other controls, refer to the separate instructions for these control units.

8. Troubleshooting

This chapter describes troubleshooting methods for fixing problems. If you experience an error that is not listed in this table, please contact your supplier.

- ▶ Only qualified specialists who have received electrician training should carry out troubleshooting and repairs.

Problem	Possible cause	Solution
The handset or drive system is not functioning.	There is no mains supply voltage.	Connect the mains power.
	The hand switch or drive system is defective.	Please contact your supplier or sales agent.
The drive is suddenly not capable of movement.	The overheating protection or system protection has been triggered.	Remove the overload (change or remove the load). Allow the system to rest for 20 to 30 minutes with the mains power unplugged. If this does not resolve the problem, contact your supplier or distributor.
	The unit's fuse may have been triggered or may be broken.	Please contact your supplier or sales agent.
	There is no mains supply voltage.	Connect the mains power.
	A lead-in connection has been interrupted (mains power, hand switch or auxiliary drive).	Check the cables and reinsert them, if required.
The battery-operated reset is not functioning.	The battery is empty.	Check the battery and replace if necessary.
	Battery is not connected.	Connect the battery.

9. Maintenance

9.1 Maintenance

- ▶ The OKIMAT 4 drive requires no maintenance.

9.2 Cleaning and care

- ▶ Clean the OKIMAT 4 drive as needed using a dry anti-static cloth.

NOTICE

- Always disconnect the power supply before you start to clean the drive system!
- Disconnect the nine-volt battery if you are using the battery-operated reset function.
- Never clean the OKIMAT 4 in an automated washing system or with a high-pressure cleaner. Do not allow fluids to penetrate the unit. Damage to the system could result.
- Do not use a cleanser that contains benzene, alcohol or similar solvents.
- Make sure that you do not damage the drive's connecting cable.

10. Disposal

10.1 Packaging material

The packaging material should be sorted into recyclable components and then disposed of in accordance with the appropriate national environmental regulations (in Germany according to the recycling law KrWG from 01.06.2012; internationally according to the EU Directive 2008/98/EC (Waste Framework Directive WFD as of 12.12.2008)).

10.2 Drive components

The OKIMAT 4 drive consists of electronic components, cables and metal and plastic parts. You should observe all corresponding national and regional environmental regulations when disposing of the OKIMAT 4 drive.

The disposal of the product is regulated in Germany by Elektro-G, internationally by the EU Directive 2012/19/EC (WEEE), or by any applicable national laws and regulations.

The OKIMAT 4 drive should not be disposed of with normal household waste!

The disposal of the nine-volt batteries is regulated in the EU by Battery Directive 2006/66/EC, in Germany by the BattG battery law of 25.6.2009, and internationally by any applicable national laws and regulations.

The battery should not be disposed of with normal household waste!

 2. Regroupez et comptez la quincaillerie.
 3. Munissez vous de l'outillage nécessaire.
 4. Aménagez vous une zone de montage, la moquette ou une couverture protégera des rayures.
 5. Procédez au montage, ne jamais forcer sur les assemblages, resserez les vis après quelques temps d'usage.
 6. Cet appareil peut être utilisé par des enfants à partir de 8 ans et plus et des personnes avec un handicap physique, sensoriel ou mental ou ayant un manque d'expérience et de connaissance si on leurs a donné les instructions et supervision concernant l'utilisation de l'appareil d'une manière sûre et qu'ils ont compris les dangers impliqués. Les enfants ne devront pas jouer avec l'appareil.
 7. Le nettoyage et maintenance de l'utilisateur ne devront pas être fait sans supervision.
 8. L'appareil doit uniquement être utilisé avec l'alimentation électrique fournie avec l'appareil.
 9. Il doit uniquement être alimenté avec la très basse tension de sécurité correspondante au marquage sur l'appareil.

Gardez votre notice de montage.

Si une pièce venait à manquer elle sera le moyen le plus clair pour communiquer avec votre magasin. Nous conseillons d'aérer la pièce lors du montage et quelques heures après.

- EN**
1. Identify the parts which make up your piece of furniture.
 2. Gather the hardware parts and count them.
 3. Have the necessary tools ready.
 4. Organize a space for assembly, wall carpeting or a blanket will protect the furniture against scratches.
 5. Mount the furniture, never force the parts to be assembled.
 6. This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance.
 7. Cleaning and user maintenance shall not be made by children without supervision.
 8. The appliance is only to be used with the power supply unit provided with the appliance.
 9. It must only be supplied at safety extra low voltage corresponding to the marking on the appliance.

Tighten the screws after it has been used for some time.

Keep the assembly instruction since it will help you when you get in touch with the store if a part should be missing.

We advise ventilating the room during installation and during few hours after.

- DE**
1. Bitte überprüfen Sie, ob alle Einzelteile Ihres Möbelstücks vorhanden sind.
 2. Bitte überprüfen Sie, ob alle Schrauben und Verbindungsteile für die Montage vorhanden sind.
 3. Halten sie alle notwendigen Montage-Werkzeuge für ihren Einsatz gebrauchsbereit.
 4. Bereiten Sie einen passenden Ort für die Montage vor. Ein Teppichboden oder ähnliches schützt vor Kratzern.
 5. Beginnen Sie mit der Montage. Lassen Sie sich Zeit und fügen Sie die Einzelteile nie mit Gewalt zusammen.
 6. Dieses Gerät kann von Kindern ab 8 Jahren und Personen mit eingeschränkten körperlichen, sensorischen oder geistigen Fähigkeiten oder Mangel an Erfahrung und Wissen benutzt werden, wenn sie unter Aufsicht oder Anleitung hinsichtlich der sicheren Benutzung des Geräts stehen und die damit verbundenen Risiken verstehen. Kinder dürfen nicht mit dem Gerät spielen.
 7. Reinigung und Benutzerwartung dürfen von Kindern nicht ohne Beaufsichtigung vorgenommen werden.
 8. Das Gerät darf nur mit der hierfür bereitgestellten Stromversorgung betrieben werden.
 9. Es darf für zusätzliche Sicherheit nur mit Niederspannung entsprechend der Markierung am Gerät betrieben werden.

Um einen langfristigen und einwandfreien Gebrauch zu gewährleisten, ziehen Sie die einzelnen Schrauben regelmäßig nach längerer Nutzung des Möbelstücks fest.

Bitte bewahren Sie diese Montageanleitung auf. Diese gewährt im Problemfall einen reibungslosen und schnellen Kommunikationsaustausch mit dem Kundenservice Ihres Geschäfts.
Wir beraten, lüften Sie den Raum während der Installation und ein paar Stunden später.

-  ES
1. Localice las piezas que componen su mueble.
 2. Reagrupe y cuente la tornillería.
 3. Prepare las herramientas necesarias.
 4. Prepare una zona de montaje, la moqueta o una manta protegerá de arañazos.
 5. Proceda al montaje, no forzar sobre los embalajes, apretar los tornillos después de algún tiempo de uso.
 6. Este aparato lo pueden utilizar menores de 8 años y mayores y personas con discapacidad física, sensorial o mental o con falta de experiencia y conocimiento si se les supervisa o se les da instrucciones relativas a cómo utilizar el aparato de manera segura y entienden los riesgos que su uso conlleva. Los niños no deberán jugar con el aparato.
 7. Los niños no deberán llevar a cabo la limpieza ni el mantenimiento sin ningún tipo de supervisión.
 8. El aparato solo debe usarse con la unidad de batería suministrada con el mismo.
 9. Solamente se debe alimentar con la tensión extrabaja de seguridad correspondiente al marcado del aparato.

Guardar las instrucciones de montaje.

Si una pieza le faltase, será la manera más fácil de comunicarse con su proveedor.

Aconsejamos ventilar la zona durante la instalación y algunas horas después.

-  IT
1. Identificare le parti che compongono il mobile.
 2. Raccogliere le parti e contarle.
 3. Tenere pronti gli attrezzi necessari.
 4. Organizzare uno spazio per il montaggio, un telo da parete o una coperta proteggerà i mobili contro i graffi.
 5. Montare il mobile, non forzare mai le parti da assemblare.
 6. Quest'apparecchio può essere usato da bambini dagli 8 anni in su e da persone con ridotte capacità fisiche, sensoriali o mentali o con mancanza di esperienza e conoscenza se sono supervisionati o istruiti riguardo l'utilizzo dell'apparecchio in modo sicuro e se comprendono i pericoli coinvolti. I bambini non devono giocare con l'apparecchio.
 7. La pulizia e la manutenzione dell'utente non devono essere eseguite da bambini senza supervisione.
 8. L'apparecchio deve essere usato solo con l'unità di alimentazione fornita.
 9. Deve essere alimentato solo con un voltaggio extra basso corrispondente al segno dell'apparecchio.

Serrare le viti dopo che sono state usate per un certo periodo di tempo.

Conservare le istruzioni di montaggio poiché vi torneranno utili quando ricontatterete il negozio se una parte dovesse mancare.

Si consiglia di ventilare la stanza durante l'installazione e durante le ore successive.

-  NL
1. Identificeer de onderdelen waar uw stuk meubilair uit bestaat.
 2. Verzamel de hardwareonderdelen en tel deze.
 3. Heb het vereiste gereedschap bijdehand.
 4. Organiseer een ruimte voor assemblage; muurtapejt of een deken zal het meubilair beschermen tegen krassen.
 5. Monteer het meubilair en forceer hierbij nooit de te monteren onderdelen.
 6. Dit apparaat mag worden gebruikt door kinderen vanaf 8 jaar en personen met verminderde lichamelijke, zintuiglijke of mentale capaciteiten of een tekort aan kennis en ervaring, vooropgesteld dat zij onder toezicht staan of instructies hebben gekregen met betrekking tot veilig gebruik van het apparaat en de betrokken risico's begrijpen. Kinderen mogen het apparaat niet als speelgoed gebruiken.
 7. Reiniging en gebruikersonderhoud mogen niet worden uitgevoerd door kinderen zonder toezicht.
 8. Het apparaat mag alleen worden gebruikt met de voedingseenheid meegeleverd met het apparaat.
 9. Het mag alleen worden aangedreven op extralage veiligheidsspanning in overeenstemming met de markeringen op het apparaat.

Draai de schroeven vast nadat het een tijdje in gebruik is geweest.

Bewaar de assemblage-instructies in het geval dat u contact op moet nemen met de winkel indien er een onderdeel ontbreekt.

Wij raden u aan de kamer te ventileren tijdens en voor enkele uren na de installatie.

1. Identifique as peças que constituem a sua mobília.
2. Junte as ferragens e conte.
3. Tenha prontas as ferramentas necessárias.
4. Organize e arranje espaço para a montagem, colocando um tapete ou manta para proteger a mobília contra riscos.
5. Monte a mobília, nunca force as peças a montar.
6. Este aparelho pode ser utilizado por crianças com mais de 8 anos e por pessoas com capacidades físicas, sensoriais ou mentais reduzidas ou falta de experiência e conhecimento, caso recebam supervisão ou instruções sobre o uso do aparelho de uma forma segura e entendam os perigos envolvidos. As crianças não devem brincar com o aparelho.
7. A limpeza e manutenção pelo utilizador não devem ser realizadas por crianças sem supervisão.
8. O aparelho só deve ser utilizado com a unidade de corrente elétrica facultada com o aparelho.
9. Deve ser facultada uma tensão extra baixa de segurança, correspondente à indicação no aparelho.

PT

Aperte os parafusos após a peça de mobília ter sido utilizada durante algum tempo.
 Guarde as instruções de montagem, pois serão úteis quando quiser contactar a loja, caso perca alguma peça.
 Aconselhamos a ventilar a divisão durante a instalação e algumas horas depois.

1. Zidentyfikuj części, z których składa się Twój mebel.
2. Zbierz części sprzętowe i policz je.
3. Przygotuj niezbędne narzędzia.
4. Zorganizuj miejsce do montażu, wykładzina ścienna lub koc zabezpieczą mebel przed zarysowaniami.
5. Zamontuj mebel, nigdy nie na siłę montuj części.
6. To urządzenie może być używane przez dzieci w wieku od 8 lat i starsze oraz osoby o ograniczonych zdolnościach fizycznych, sensorycznych lub umysłowych lub bez doświadczenia i wiedzy, jeśli znajdują się pod nadzorem lub są poinstruowane w zakresie bezpiecznego użytkowania urządzenia i rozumieją związane z tym zagrożenia. Dzieci nie mogą bawić się urządzeniem.
7. Czyszczenia i konserwacji przez użytkownika nie powinny wykonywać dzieci bez nadzoru.
8. Urządzenie może być używane wyłącznie z zasilaczem dostarczonym wraz z urządzeniem.
9. Może być zasilany wyłącznie bezpiecznym niskim napięciem odpowiadającym oznaczeniu na urządzeniu.

PL

Dokręć śruby po pewnym czasie użytkowania. Zachowaj instrukcję montażu, ponieważ pomoże ci ona w kontakcie ze sklepem, jeśli brakuje części. Zalecamy przewietrzenie pomieszczenia podczas instalacji oraz kilka godzin po jej zakończeniu.

Entretien et maintenance:

Dépoussiérer régulièrement avec un chiffon sec.

Nettoyer avec du liquide vaisselle et essuyer avec un chiffon humide.

Ne pas utiliser le produit si l'un des éléments semble endommagé, brisé ou manque.

Eviter de placer ce produit à proximité de feu ouvert et d'autres sources de forte chaleur telle qu'un radiateur.

Care and maintenance:

Remove dust regularly with a dry cloth.

Clean with dishwashing liquid and wipe with a damp cloth.

Do not use the product if any part appears damaged, broken or missing.

Be aware of the risk of open fire and other sources of strong heat, such as electric heaters, in the vicinity of the product.

Pflege und Wartung:

Entfernen Sie den Staub regelmäßig mit einem trockenen Tuch.

Reinigen Sie mit Spülmittel und wischen Sie mit einem feuchten Tuch.

Verwenden Sie das Produkt nicht, wenn Teile beschädigt, defekt sind oder fehlen.

Achten Sie auf die Gefahr von Feuer und anderen starken Wärmequellen in der Nähe des Produkts, wie elektrische Heizkörper.

Cuidado y mantenimiento:

Quite el polvo periódicamente con un paño seco.

Limpiar con líquido para lavar platos y limpie con un paño húmedo.

No utilice el producto si alguna de las piezas está dañada, rota o falta.

Conozca los riesgos de un fuego y de otras fuentes de calor fuerte, como los calefactores eléctricos, en las proximidades del producto.

Cura e manutenzione:

Rimuovere la polvere regolarmente con un panno asciutto.

Pulire con detersivo per piatti e asciugare con un panno umido.

Non utilizzare il prodotto se una parte risulta danneggiata, rotta o mancante.

Essere consapevoli del rischio rappresentato da un camino e da altre fonti di forte calore, come riscaldatori elettrici, in prossimità del prodotto.

Onderhoud en reiniging:

Verwijder regelmatig enigerlei stof met een droge doek.

Reinig met afwasmiddel en veeg af met een vochtig doekje.

Gebruik het product niet als enigerlei onderdelen beschadigd lijken, gebroken zijn of ontbreken.

Houd rekening met de risico's van open vuur en andere krachtige hittebronnen, zoals elektrische verwarmingen, in de buurt van het product.

Cuidado e manutenção:

Remova frequentemente a poeira com um pano seco.

Limpe com detergente da loiça e um pano humedecido.

Não utilize o produto se alguma peça parecer danificada, partida ou em falta.

Tenha em atenção o risco de chama viva e de outras fontes de calor forte, como aquecedores elétricos, perto do produto.

Opieka i utrzymanie:

Regularnie usuwaj kurz suchą szmatką.

Wyczyść płynem do mycia naczyń i wytrzyj wilgotną szmatką.

Nie używaj produktu, jeśli jakkolwiek część wygląda na uszkodzoną, zepsutą lub brakującą.

Należy pamiętać o ryzyku otwartego ognia i innych źródeł silnego ciepła, takich jak grzejniki elektryczne, w pobliżu produktu.

ENLEVEMENT DES APPAREILS MENAGERS USAGES

La directive Européenne sur les Déchets des Equipements Electriques et Electroniques (DEEE), exige que les appareils ménagers usagés ne soient pas jetés dans le flux normal des déchets municipaux. Les appareils usagés doivent être collectés séparément afin d'optimiser le taux de récupération et le recyclage des matériaux qui les composent et réduire l'impact sur la santé humaine et l'environnement. Le symbole de la poubelle barrée est apposé sur tous les produits pour rappeler les obligations de la collecte séparée. Les consommateurs devront contacter les autorités locales ou leur revendeur concernant la démarche à suivre pour l'enlèvement de leur appareil.

CORRECT DISPOSAL OF THIS PRODUCT

This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.

RICHTIGE ENTSORGUNG DES PRODUKTS

Dieses Symbol bedeutet, dass dieses Produkt in der gesamten EU nicht im Hausmüll entsorgt werden darf. Um mögliche Gefahren für die Umwelt oder Gesundheit durch unkontrollierte Müllentsorgung zu vermeiden, müssen Sie es verantwortungsbewusst recyceln, um die nachhaltige Wiederverwendung von Materialressourcen zu fördern. Geben Sie das Altgerät an einer Rücknahme- oder Sammelstelle ab oder kontaktieren Sie den Händler, bei dem Sie das Produkt gekauft haben. Er kann es für umweltfreundliches Recycling zurücknehmen.

ELIMINACIÓN CORRECTA DE ESTE PRODUCTO

Estos símbolos indican que el producto no puede desecharse junto con los residuos domésticos en la Unión Europea. Para evitar los posibles daños al medio ambiente o a la salud humana que representa la eliminación incontrolada de residuos, recicle correctamente para promover la reutilización sostenible de los recursos materiales. Para devolver su dispositivo usado, utilice los sistemas de devolución y recogida adecuados, o contacte con el distribuidor que le vendió el producto. Ellos pueden llevar el producto a un centro de reciclaje adecuado.

SMALTIMENTO CORRETTO DI QUESTO PRODOTTO

Questo simbolo indica che questo prodotto non deve essere smaltito con altri rifiuti domestici in tutta la UE. Per prevenire un possibile danno all'ambiente o alla salute umana dovuto a uno smaltimento di rifiuti incontrollato, riciclare responsabilmente per promuovere il riutilizzo sostenibile delle risorse materiali. Per restituire il tuo dispositivo usato, usare i sistemi di raccolta e di restituzione o contattare il rivenditore dove il prodotto è stato acquistato. Loro possono prendere il prodotto per il riciclo ecologico sicuro.

DANK DIT PRODUCT OP CORRECTE WIJZE AF

Dit symbool geeft aan dat dit product in de EU niet met ander huishoudelijk afval mag worden afgevoerd. Recycle het op verantwoordelijke wijze om het hergebruik van natuurlijke grondstoffen te bevorderen en mogelijke schade aan het milieu of de volksgezondheid wegens ongescheiden afvalverwerking te voorkomen. Lever het apparaat aan het einde van zijn levensduur a.u.b. in op specifieke inzamelpunten of neem contact op met de winkel waar het product was aangeschaft. Zij zullen dit product accepteren voor milieuvriendelijke recycling.

ELIMINAÇÃO CORRETA DESTE PRODUTO

Esta marca indica que o produto não deve ser eliminado junto com o lixo doméstico dentro da zona da UE. Para evitar possíveis danos ao ambiente ou à saúde humana, devido a eliminação de resíduos não controlada, recicle de modo responsável, para promover a reutilização sustentável de recursos materiais. Para devolver o seu aparelho usado, utilize os sistemas de devolução e recolha ou contacte o distribuidor onde adquiriu o produto. Ele poderá entregar o produto para uma reciclagem segura a nível ambiental.

PRAWIDŁOWE UTYLIZACJA TEGO PRODUKTU

To oznaczenie wskazuje, że tego produktu nie należy wyrzucać wraz z innymi odpadami domowymi w całej UE. Aby zapobiec możliwym szkodom dla środowiska lub zdrowia ludzkiego spowodowanym niekontrolowaną utylizacją odpadów, poddawaj je odpowiedzialnemu recyklingowi, aby promować zrównoważone ponowne wykorzystanie zasobów materiałowych. Aby zwrócić zużyte urządzenie, skorzystaj z systemów zwrotu i odbioru lub skontaktuj się ze sprzedawcą, u którego zakupiono produkt. Mogą zabrać ten produkt do bezpiecznego dla środowiska recyklingu.
