Stunden

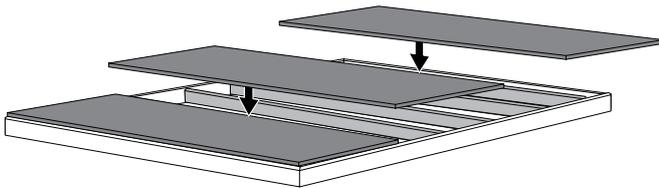

Ebenen der Bodenfläche:

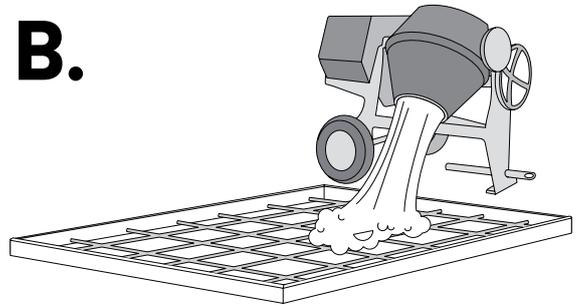

Das Gerätehaus sollte auf einer ebenen, stabilen Fläche stehen. Eine Unterkonstruktion aus Holz (A) oder Beton (B) kann optional die Standfläche verbessern.

i¹

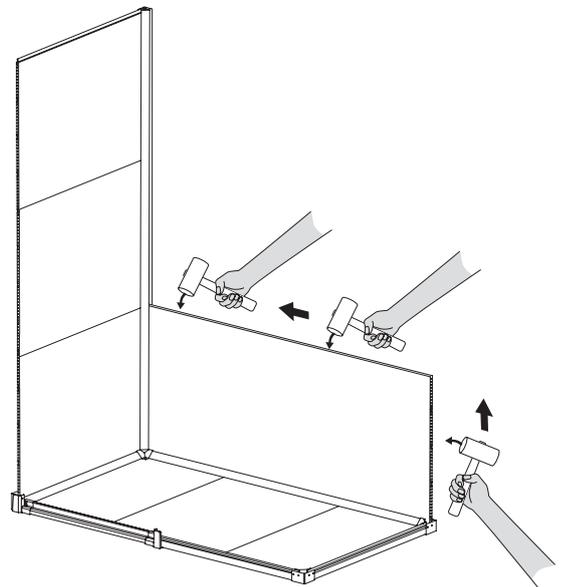

Benutze den Spachtel **SG8** und einen **Gummihammer**, um die Profile leichter mit den Panelen verbinden zu können.

i²

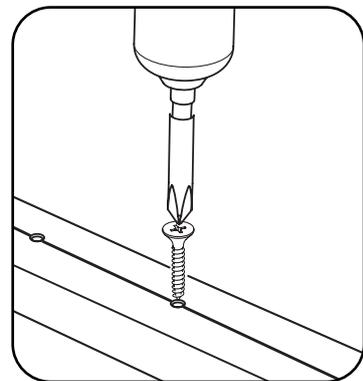

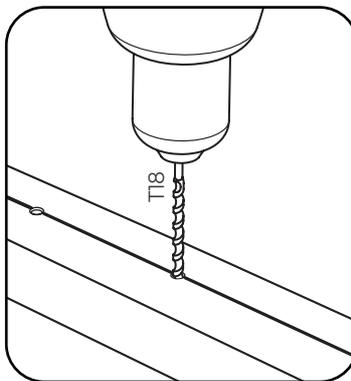

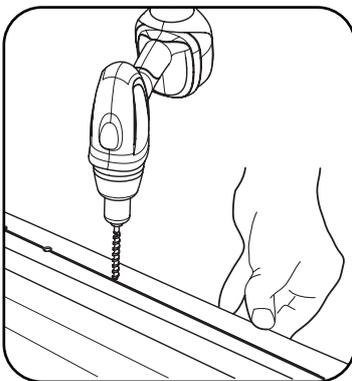

Benutze den Spachtel **SG8**, um die Panele leichter in die Nut der Profile einführen zu können.

i³

Benutze den **Gummihammer**, um die Panele und Profile vollständig miteinander verbinden zu können.

Optional

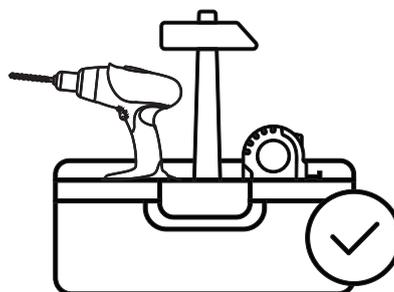

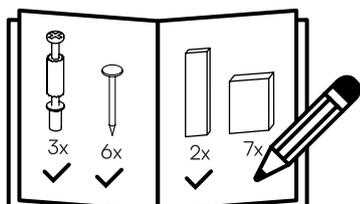

Wir empfehlen, die Löcher 2 mm tief vorzubohren, um das Einschrauben der Schrauben zu erleichtern und das Material zu schonen.

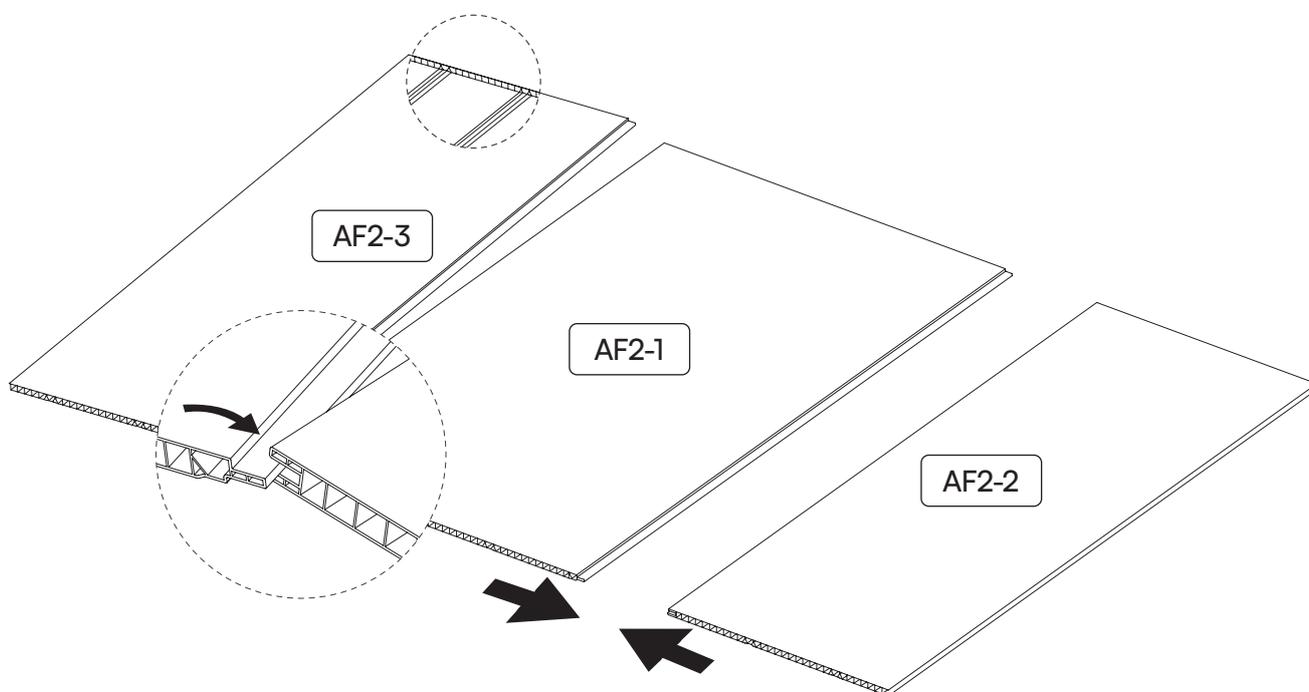

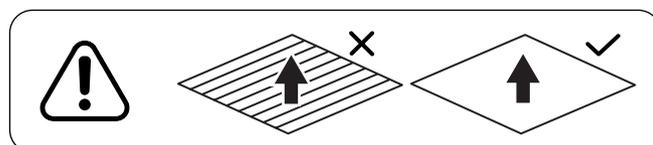

Ein letzter Check:

Bitte überprüfe, ob Du alle Teile hast.

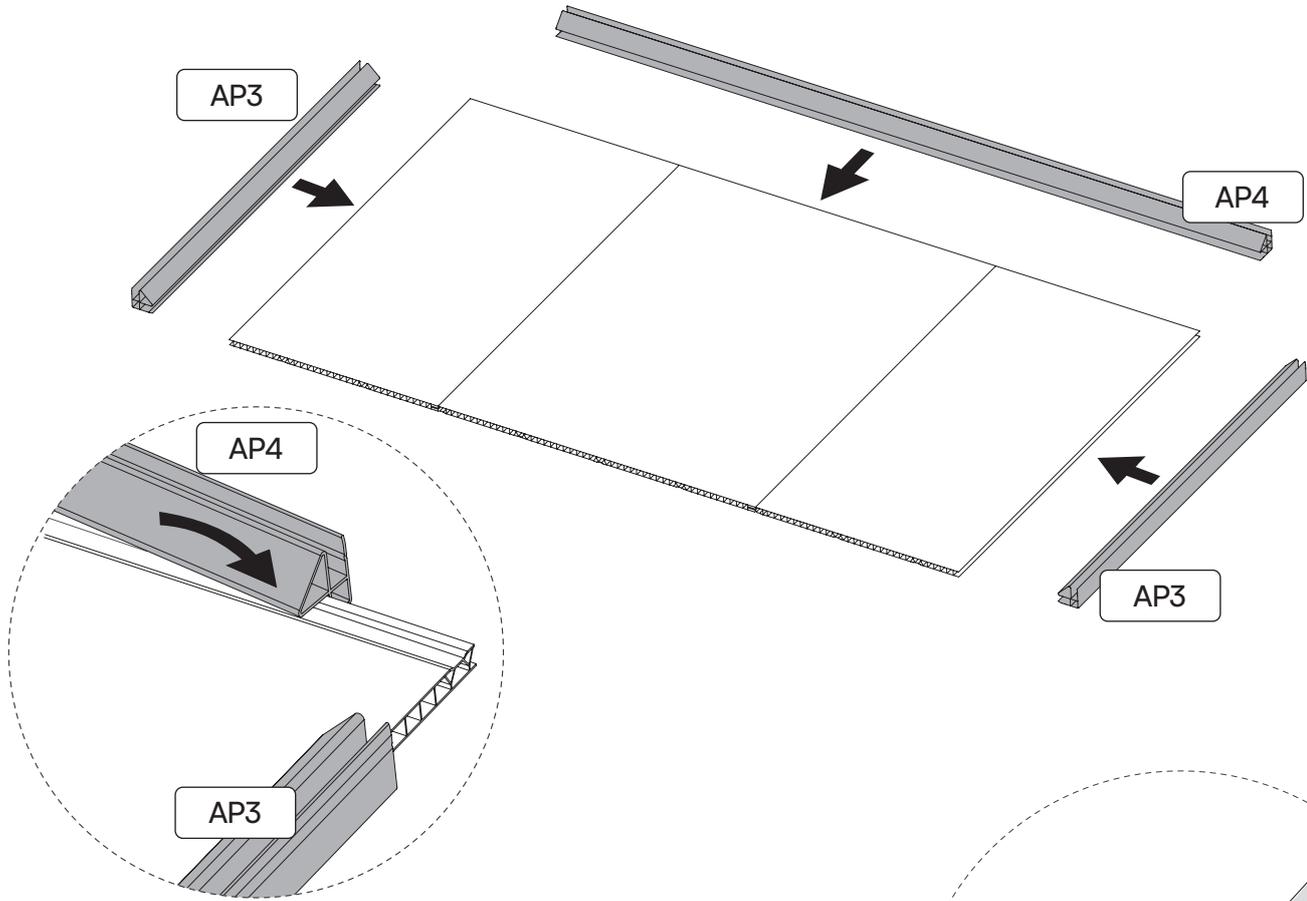

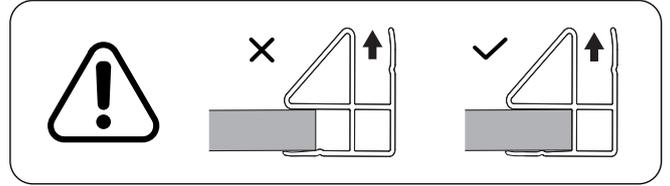

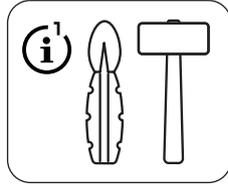

Viel Spaß beim Aufbau!
